# Gold Bio

Anti-microbial Keyboard

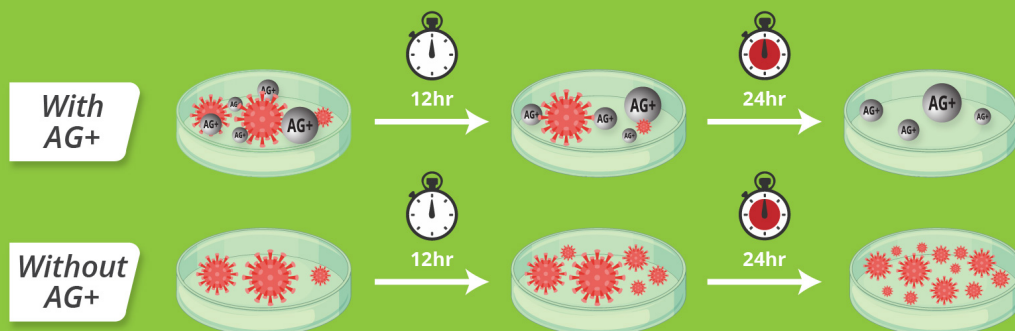

The new normal requires all of us to put safety at the forefront of our home and office. There's need for products that can protect us from harmful bacteria and infection.

TVS Gold Bio Keyboard comes with the essential Anti-microbial coating which prevents growth of harmful bacteria and thereby protect you from infection.

Antimicrobial is essentially is a silver ion coating on the TVS Gold Bio Keyboard to prevent the growth of micro-organisms even with minimal sanitisation.

The use of Antimicrobial keyboards (and products) creates a safer environment at offices, homes, health care centres and other establishments for employees, customers and goes a long way in creating trust and goodwill among customers.

*After hours, the growth of microorganisms is reduced due to the Silver Ion additive*
