The Scheme is in the best interest of the Company and its shareholders. The impact of the Scheme on the shareholders, including, the public shareholders would be the same in all respects and no shareholder is expected to have any disproportionate advantage or disadvantage in any manner. This Scheme is not in any manner prejudicial or against public interest and would serve the interest of all shareholders, creditors or any other stakeholders.

3. SOURCES OF INFORMATION

For the purpose of the recommendation of the Share Exchange Ratio, I have relied upon the following information provided by the management of the Companies:

- (a) Draft Scheme of Amalgamation (as duly certified by the Management of the Companies);
- (b) Concurrent Scheme, as defined hereinabove;
- (c) Latest shareholding pattern of the Companies;
- (d) Memorandum and Articles of Association of the Companies;
- (e) Other relevant details of the Companies such as its history, past and present activities, future plans and prospects, and other relevant information; and
- (f) Such other information and explanations as required and which have been provided by the Management of the Companies.

4. BASIS OF RECOMMENDATION

4.1. For the purpose of my opinion, I have relied upon the current shareholding pattern of the Companies, the draft Scheme of Amalgamation, Concurrent Scheme and other information as provided by the management of the Companies and their respective advisors and authorized representatives.

- 4.2. Based on review of the information made available and my discussions with the management of the Companies, authorized representatives and advisors of the Companies, some of the important factors considered for recommendation are as under:
- (a) TVSIPL holds 1,11,60,093 equity shares of Rs. 10/- each, fully paid up, representing about 59.84% of the total paid-up equity share capital of the Transferee Company. I have been given to understand that post the Concurrent Scheme being made effective, the Transferor Company would not hold any other business assets / surplus assets / investments and/or any other net liabilities, which are getting transferred pursuant to the Scheme. Hence, no value has been attributed to any other assets or liabilities except investments held in TVSEL. The management / shareholders of TVSIPL have given an undertaking that TVSIPL shall maintain sufficient cash / bank balance and liquid investments in the books of TVSIPL immediately prior to the implementation of the Scheme or otherwise will be utilized to meet the costs, fees, charges, expenses (including stamp duty payable, if any) in relation to the Proposed Scheme. Further, in the event that TVSIPL is unable to bear any expenses due to lack of sufficient funds, the shareholders of TVSIPL shall bear such expenses. Hence, no value has been attributed to any other assets or liabilities except investments held in TVSEL. Hence, TVSEL shall not bear any expenses, pursuant to the Proposed Scheme and remain value neutral to the current shareholders of TVSEL and shall not be adversely impacted;
 - (b) Further, I have been given to understand that the shareholders of TVSIPL shall indemnify and hold harmless TVSEL for losses, liabilities, costs, charges, expenses (whether or not resulting from third party claims), including those paid or suffered pursuant to any actions, proceedings, claims and including interest and penalties discharged by TVSEL but would not have been borne or payable by TVSEL, in the form and manner as may be agreed amongst TVSEL and the shareholders of TVSIPL, which may devolve upon TVSEL during the pendency of the Scheme or post the Scheme. Thus, as a result of the proposed amalgamation, TVSEL will not bear any loss, liabilities, cost, charges and expenses due to any such disputes or litigations or any other actions of TVSIPL, being the Transferor Company. Further, the management of the Companies have given an undertaking that the equity shareholders of TVSIPL (except for effect on account of Concurrent Scheme) and investments held by TVSIPL shall not

be changed during the pendency of the Scheme other than on account of the Concurrent Scheme being effective and shares issued pursuant to the Concurrent Scheme;

- (c) The equity shares held by TVSIPL in TVSEL will be cancelled and extinguished pursuant to the Scheme becoming effective and equal number of equity shares with same terms and rights attached thereto in the Transferee Company in proportion to their holding in the Transferor Company shall be issued to the equity shareholders of the Transferor Company, as a part of the Scheme. Thus, for every fresh issue of shares by TVSEL as a part of the Scheme, there is corresponding cancellation of an existing equity share, as held by TVSIPL;
- (d) Further, there would be no change in the aggregate promoters' shareholding in the Transferee Company and hence, shall not affect the interest of any of the shareholders of the Transferee Company. Accordingly, valuation approaches as indicated in the format as prescribed under Part I - (A)(4)(a) of SEBI master circular no. SEBI/HO/CFD/POD-2/P/CIR/2023/93 dated 20th June 2023 have not been undertaken as they are not relevant with respect to the Proposed Scheme;
- (e) Upon the Scheme becoming effective, there is no additional consideration being discharged in the form of equity shares or securities or assuming liabilities of the Transferor Company by the Transferee Company. The consideration proposed to be discharged shall be in the form of same number of shares held by the Transferor Company in the Transferee Company. The Scheme does not envisage dilution of the holding of any one or more of the shareholders as a result of operation of the Scheme;
- (f) Post giving effect to the Scheme, 1,11,60,093 equity shares of Rs. 10 each fully paid up, representing about 59.84% of the total paid up share capital of the Transferee Company would be held directly by the shareholders of TVSIPL in the same proportion of their shareholding (in % terms) in TVSIPL. Thereby, the beneficial shareholding would remain unchanged and the interest of the shareholders of TVSEL will effectively remain unchanged and shareholders interest would not be prejudicially affected;
- (g) The number of shares in fraction shall be consolidated and/or round off such fractional entitlements into whole number of shares to nearest integer such that interest of the public shareholders of TVSEL

are not prejudicially affected.

- 4.3. It is universally recognized that the basis of recommendation is not an exact science and that determining the Share Exchange Ratio necessarily involves selecting an approach that is suitable for the purpose. The application of any particular approach depends upon various factors including nature of its business, overall objective of the Scheme and the purpose of recommendation.

5. SHARE EXCHANGE RATIO

- 5.1. In the ultimate analysis, recommendation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

'If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible.'

- 5.2. The fair basis of Share Exchange Ratio under the Scheme would have to be determined after taking into consideration all the factors and approach mentioned hereinabove and considering participant specific view taking into account the nature of the Scheme. It is however important to note that in doing so, I am not attempting to arrive at the absolute value per share of the Companies. Upon the Scheme becoming effective, shares held by TVSIPL in TVSEL would be held directly by the shareholders of TVSIPL, in the same proportion of their shareholding (in % terms) in TVSIPL. Thereby, the beneficial shareholding of TVSEL would remain unchanged and the interest of the shareholders of TVSEL will effectively remain unchanged and shareholders interest would not be prejudicially affected, as a result of the

Scheme. Hence, no relative valuation of the two entities is required to be undertaken to facilitate the determination of the Share Exchange Ratio.

- 5.3. Further, there would be no change in the aggregate promoters' shareholding in the Transferee Company and hence, shall not affect the interest of any of the shareholders of the Transferee Company for the reasons enlisted in Para 4 – Basis of Recommendation. Accordingly, valuation approaches as indicated in the format as prescribed under Part I - (A)(4)(a) of SEBI master circular no. SEBI/HO/CFD/POD-2/P/CIR/2023/93 dated 20th June 2023 have not been undertaken as they are not relevant with respect to the proposed Scheme. For the purpose of the current exercise, I have provided following weights to the valuation methodologies based on our basis of recommendation and other various factors relevant to the valuation exercise for recommendation of Equity Share Exchange Ratio:

Particulars	TVS Investments Private Limited		TVS Electronics Limited	
	<i>Value per Share (Rs.)</i>	<i>Weights</i>	<i>Value per Share (Rs.)</i>	<i>Weights</i>
Asset Approach	NA	NA	NA	NA
Market Approach	NA	NA	NA	NA
Income Approach	NA	NA	NA	NA
Relative Value per share	NA		NA	

NA = Not Adopted / Not Applicable, as provided in Para 4 – Basis of Recommendation

- 5.4. In the present facts and circumstances and based on the information and explanation provided to me, I believe that the following Share Exchange Ratio, after giving due consideration to the management representations and the fact that upon Scheme becoming effective, 1,11,60,093 equity shares of Rs. 10 each fully paid up, representing about 59.84% of the total paid up share capital of the Transferee Company shall get cancelled and same number of equity shares will be issued to the equity shareholders of the Transferor company in the manner provided under the Scheme. Thereby the interest of the shareholders in TVSEL will effectively remain unchanged and shareholders interest would not be prejudicially affected. Further, the Scheme does not envisage dilution of the holding of any one or more of the shareholders as a result of the Scheme becoming effective, the Share Exchange Ratio would be fair and reasonable for the shareholders of TVSIPL and TVSEL:

"1,11,60,093 fully paid-up equity shares of Rs. 10/- each of the Transferee Company shall be issued and allotted as fully paid up to the equity shareholders of the Transferor Company in proportion of their holding in the Transferor Company"

In the event that the New Equity shares to be issued result in fractional entitlement, the Board of Directors of the Transferee Company shall be empowered to consolidate and/or round off such fractional entitlements into whole number of New Equity shares to nearest integer. However, in no event, the number of New Equity shares to be allotted by the Transferee Company to the equity shareholders of the Transferor Company shall exceed the total number of equity shares held by the Transferor Company in the Transferee Company.

Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the Financial Statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism through the audit. We are also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has an adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation

evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company.
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system with reference to standalone financial statements and such internal financial controls over financial reporting were operating

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

1. NOTES FORMING PART OF THE FINANCIAL STATEMENTS**a) Brief description of the Company**

TVS Electronics Limited (the Company) is a public limited company incorporated and domiciled in India whose shares are publicly traded. The registered office is located at Greenways Towers, 2nd Floor, No. 119, St. Mary's Road, Abhiramapuram, Chennai - 600 018.

The Company manufactures and sells Point of sale devices, Printers, Keyboards, etc. besides providing service for various Original Equipment Manufacturers via delivery models like exclusive service centers, multi brand service centers, Onsite support, repair centers and factories.

b) MATERIAL ACCOUNTING POLICIES**1) Basis of preparation**

"The financial statements have been prepared in accordance with Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015. The Ind AS are prescribed under Section 133 of the Companies Act, 2013 ("the Act") read with Rule 3 of Companies (Indian Accounting Standards) Rules, 2015 and relevant amendments and rules issued thereafter. The Financial Statements are presented in Indian Rupees (₹) and all values are rounded to the nearest Lakhs (₹ 00,000), except when otherwise indicated."

2) Basis of measurement

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

3) Critical accounting judgements, key sources of estimation uncertainty and applicability of new accounting standards**a) Use of estimates**

The preparation of financial statements in conformity with Ind AS requires management to make certain estimates and assumptions that affect the amounts reported in the financial statements and notes thereto. The management believes that these estimates and assumptions are reasonable and prudent. However, future results could differ from these estimates and the differences between actual results and estimates are recognised in the period in which results are known / materialised.

Estimates and underlying assumptions are reviewed on an ongoing basis and any revision to accounting estimates is recognised prospectively in the current and future period.

This note provides an overview of the areas that involved a higher degree of judgment or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in the relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

b) Significant Estimates and judgements

The areas involving critical estimates or judgments are:

i) Fair valuation measurement & valuation process

Some of the Company's assets and liabilities are measured at fair value for financial reporting purposes. In estimating the fair value of an asset or a liability, the Company uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Company engages third party valuers, where required, to perform the valuation. Information about the valuation techniques and inputs used in determining the fair value of various assets, liabilities and share based payments are disclosed in the notes to the financial statements.

ii) Actuarial Valuation

The determination of Company's liability towards defined benefit obligation to employees is made through independent actuarial valuation including determination of amounts to be recognised in the Statement of Profit and Loss and in other comprehensive income. Such valuation depend upon assumptions determined after taking into account inflation, seniority, promotion and other relevant factors such as supply and demand factors in the employment market. Information about such valuation is provided in notes to the financial statements.

iii) Useful life of Property, Plant and Equipment & Intangible assets

As described in the material accounting policies, the Company reviews the estimated useful lives of property, plant and equipment and intangible assets at the end of each reporting period.

iv) Revenue Recognition

- The Company's contracts with customers could include promises to render multiple services to a customer. The Company assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves Judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.

-Judgement is also applied to determine the principal and agent in the contracts with customers based on the substance of the arrangement read with the guidance provided in the standard.

-The Company uses judgement to determine standalone selling price of a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

-The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time.

v) Impairment of Financial and Non-Financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or a group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward-looking estimates at the end of each reporting period.

In case of non-financial assets Company estimates asset's recoverable amount, which is higher of an asset's or Cash Generating Units (CGU's) fair value less costs of disposal and its value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

4) Revenue Recognition

The Company earns revenue primarily from sale of electronic goods, computer consumable and other support services.

Revenue is measured at the fair value of the consideration received or receivable and net of returns, allowances and rebates and goods and services tax.

Revenue is recognised upon transfer of control of promised products or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services. When there is uncertainty on ultimate collectability, revenue recognition is postponed until such uncertainty is resolved.

The amount of revenue recognised depends on whether we act as an agent or as a principal. Certain arrangements with our clients are such that our responsibility is to arrange for a third party to provide a specified good or service to the client. In these cases we are acting as an agent as we do not control the relevant good or service before it is transferred to the client. When we act as an agent, the revenue recorded is the net amount retained. The Company acts as principal when we control the specified good or service prior to transfer. When the Company acts as a principal, the revenue recorded is the gross amount billed.

Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Hence, the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II of the Companies Act 2013.

Capital work-in-progress: Projects under which plant, property and equipment are not yet ready for their intended use are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

6) Intangible assets

a. Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortization and accumulated impairment losses. Amortization is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

b. Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognized.

c. Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

Intangible asset	Useful life
Computer softwares	2 years
Business Rights	Indefinite

7) Impairment of Tangible and Intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

8) Inventories

Inventories are stated at lower of cost or net realisable value. The cost is calculated on weighted average method. Cost comprises expenditure incurred in normal course of business in bringing such inventory to its present location and condition and includes where applicable, appropriate overheads based on the normal level of activity.

Net realisable value is the estimated selling price less estimated cost for completion of sale.

Obsolete, slow moving and defective inventories are identified from time to time and where necessary, a provision is made for such inventories.

9) Employee benefits**(i) Short term Employee Benefits**

A liability is recognised for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

(ii) Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period.

Defined benefit costs are categorized as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- Remeasurement

The company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'.

Past service cost is recognised in profit or loss in the period of a plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss.

Curtailment gains and losses are accounted for as past service costs. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Contributions paid/payable to defined contribution plans comprising of Superannuation (under a scheme of Life Insurance Corporation of India) and Provident Funds for certain employees covered under the respective Schemes are recognised in the Statement of Profit and Loss each year.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Gratuity for employees is covered under a Scheme of Life Insurance Corporation of India (LIC) and contributions in respect of such scheme are recognized in the Statement of Profit and Loss. The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out as at the end of the year.

TVS ELECTRONICS LIMITED**NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024****10) Taxes on income**

Tax expense comprises of current and deferred taxes.

Current tax:

The current tax payable is based on the taxable profit for the year. Taxable profit differs from Profit before tax as reported in the statement of profit and loss account because of items of income or expenditure that are taxable or deductible in other years and items that are never taxable or deductible. Company computes current tax using tax rate that have been enacted by the end of the reporting period.

Deferred Tax:

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year:

Current and deferred tax are recognised in profit or loss account, except when they relate to items that are recognised in other comprehensive income or directly in equity respectively.

11) Provisions and contingent liabilities**(i) Provision:**

A provision is recorded when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reasonably estimated.

The amount recognised as provision is the best estimate of the consideration required to settle the present obligation at the end of reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is present value of these cash flows (when the effect of time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provision for expected cost of warranty obligations under the local sale of goods legislation are recognised at the date of sale of relevant products, at management's best estimate of expenditure required to settle the company's obligation.

(ii) Contingent liabilities:

Wherever there is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or a present obligation that arises from past events but is not recognised because

- (a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- (b) the amount of the obligation cannot be measured with sufficient reliability.

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidence on corrective actions on product failures. The timing of outflows will vary as and when warranty claim will arise, being typically upto three years.

Expected recoveries towards warranty cost from the vendors are estimated and accounted for by the management in the year in which the related provision for warranty is created and it is certain that such recoveries will be received if the Company incurs the warranty cost.

The estimates used for accounting for warranty liability/recoveries are reviewed periodically and revisions are made, as required.

(iv) E-Waste

Environment Liabilities E-Waste (Management) Rules, 2016, as amended, requires the Company to complete the Extended Producer Responsibility targets measured based on sales made in the preceding years, if it is a participant in the market during a financial year. Accordingly, the obligation event for e-waste obligation arises only if the Company participate in the markets in those years.

12) Operating Segment

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker (CODM). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Corporate Management Committee.

Segments are organised based on business which have similar economic characteristics as well as exhibit similarities in nature of products and services offered, the nature of production processes, the type and class of customer and distribution methods.

“Unallocated Corporate Expenses” include revenue and expenses that relate to initiatives/costs attributable to the enterprise as a whole and are not attributable to segments.

13) Leases

The leases are recognized as a right-of-use asset with a corresponding lease liability at the date on which the leased asset is available for use by the Company as a lessee except for payments associated with short term leases (lease term of 12 months or less) and low value leases, which are recognized as an expense as and when incurred.

The Company assesses whether a contract contains a lease at the inception of a contract. Certain lease contracts include the options to extend or terminate the lease before the end of the lease term. Right-of-Use assets and lease liabilities include these options when it is reasonably certain that they will be exercised.

The Right-of-Use assets are initially recognized at cost comprising initial lease liability adjusted for lease payments made on or before the commencement date less any lease incentives received and any initial direct cost. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. Lease liabilities are re-measured with a corresponding adjustment to the related Right-of-Use assets if the Company changes its assessment as to whether it will exercise an extension or a termination option.

Right-of-Use assets are depreciated on a straight-line basis over the shorter of the lease term and the useful life of the asset

Right-of use assets and lease liability have been separately presented in the balance sheet and lease payments have been classified as financing cash flow in the cash flow statement.

14) Financial instruments

Financial assets and financial liabilities are recognised when a company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

14.1 Financial assets

Initial recognition and measurement:

All regular way purchases or sales of financial assets are recognised and derecognized on a trade date basis.

Subsequent measurement:

All recognised financial assets are subsequently measured in their entirety at either amortized cost or fair value, depending on the classification of the financial assets

a. Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortized cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investment in subsidiaries / associates are accounted at cost.

All other financial assets are subsequently measured at fair value.

For the impairment policy on financial assets measured at amortized cost, refer Note 1(b)(14)(d)

b. Investment in equity instruments at FVTOCI

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Company has made an irrevocable election for its investments which are classified as equity instruments to present the subsequent changes in fair value in other comprehensive income based on its business model.

The company has equity investments in entities which are neither held for trading nor a subsidiary or associate to the company. The company has elected FVTOCI irrevocable option for these investments. Fair value is determined in the manner described in note 1(b)(2).

A financial asset is held for trading if:

- > it has been acquired principally for the purpose of selling it in near term; or
- > on initial recognition it is part of portfolio of identified financial instrument that the company manages together and has recent actual pattern of short term profit making or
- > it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Dividends on these investment in equity instrument, if any will be recognised in profit or loss when the company's right to receive the dividend is established, it is probable that economic benefit associated with the dividend will flow to the entity, the dividend does not represent a recover of part of cost of investment and the amount of dividend can be measured reliably.

c. Financial assets at fair value through profit or loss (FVTPL)

Financial assets that do not meet the amortised cost criteria or Fair value through other comprehensive income (FVTOCI) criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the "Other income" line item.

d. Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument through the expected life of that financial instrument.

TVS ELECTRONICS LIMITED**NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024**

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information on a case to case basis.

e. Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

f. Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss.

14.2 Financial liabilities and equity instruments**a. Classification as debt or equity**

Debt and equity instruments issued by the company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

b. Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a company entity are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

c. Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

c.1. Financial liabilities at FVTPL

Financial liabilities are recognised at fair value through profit or loss (FVTPL) if it includes derivative liabilities.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item.

Fair value is determined in the manner described in note 1(b)(2)

c.2. Financial liabilities measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortized cost are determined based on the effective interest method.

For TVS ELECTRONICS LIMITED

TVS ELECTRONICS LIMITED**NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024**

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Trade and other payables are recognised at the transaction cost, which is its fair value, and subsequently measured at amortised cost.

c.3. Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortized cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortized cost of the instruments and are recognised in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

c.4. Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognised in profit or loss.

14.3 Derivative financial instruments

The Company enters into forward contracts to manage its exposure to foreign exchange rate risks.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately.

15. Foreign Currency Transactions

The functional and presentation currency of the company is Indian Rupee.

In preparing the financial statements of the company, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

16 Operating cycle for current and non-current classification

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

17 Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

36(v)(a) Foreign Currency sensitivity analysis

The following table details the company's sensitivity to a 10% increase and decrease in the ₹ against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans where the denomination of the loan is in a currency other than the functional currency of the lender or the borrower. A positive number below indicates an increase in profit or equity where the ₹ strengthens 10% against the relevant currency. For a 10% weakening of the ₹ against the relevant currency, there would be a comparable impact on the profit or equity.

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

36(vi) Interest rate risk management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a mixed portfolio of fixed and variable rate loans and borrowings.

36(vi)(a) Interest rate sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

Particulars	March 31, 2024	March 31, 2023
Impact on profit & loss account (in ₹ lakhs)	19	8

36(vii) Other price risks

The Company is exposed to equity price risks arising from equity investments. Equity investments are held for strategic purposes. The Company doesn't actively trade these investments.

36(viii)(a) Equity Price Sensitivity Analysis

The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period. If equity prices had been 100 points higher/lower:

Particulars	For the year ended 31st March 2024	For the year ended 31st March 2023
Impact on OCI	1.3	1.1

36(viii) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company uses other publicly available financial information and its own trading records to review its major customers. The Company's exposure is continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

36(vi) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

36(vi)(a) Liquidity and interest risk tables

The amounts included in the following table for financial guarantee contracts are the maximum amount the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee (see note 35). Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that no amount will be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses. The contractual maturity is based on the earliest date on which the Group may be required to pay.

The table below provides details regarding the contractual maturities of financial liabilities including estimated interest payments as at March 31, 2024.

Particulars	Less than 1 year	1-3 year	3 - 5 year	5+ years	Total contractual cash flows	Carrying amount
Trade payables	3,743	-	-	-	3,743	3,743
Borrowings	2,213	969	-	532	3,714	3,714
Other financial liabilities	-	-	-	-	-	-

The table below provides details regarding the contractual maturities of financial liabilities including estimated interest payments as at March 31, 2023.

Particulars	Less than 1 year	1-3 year	3 - 5 year	5+ years	Total contractual cash flows	Carrying amount

36(x) Fair value measurements

36.10.1 Fair value of the Company's financial assets and financial liabilities that are measured at fair value on a recurring basis

Fair value hierarchy

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 – Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Some of the company's financial assets and financial liabilities are measured at fair value at the end of the reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique (s) and inputs used).

Particulars	Fair value hierarchy	As at March 31, 2024			As at March 31, 2023

Trade payables	Level 2	7,187	-	-	6,820	-	-

The Management assessed that fair value of cash and short-term deposits, trade receivables, other current assets, trade payables, bills discounting and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

38. Employee benefit plans

(i). Defined contribution plans :

The Company makes provident fund contributions and National Pension fund contributions for qualifying employees. Under the scheme, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Contributions payable by the Company are at rates specified in the rules of the Schemes/Policy and the details of expense recognised during the year on account of such defined benefit plan is **Rs. 286 Lakhs** (Previous year Rs. 233 Lakhs)

(ii). Defined benefit plans :

Gratuity -

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to the employees on retirement or termination of employment.

In respect of Gratuity plan, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as March 31, 2024. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit cost method. The following table sets forth the status of the Gratuity Plan of the Company and the amount recognized in the Balance Sheet and Statement of Profit and Loss. The Company provides the gratuity benefit through annual contributions to a fund managed by the Life Insurance Corporation of India (LIC).

The Company is exposed to various risks in providing the above gratuity benefit which are as follows:

Interest Rate risk : The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements).

Investment Risk : The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.

Salary Escalation Risk : The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

Demographic Risk : The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. **Responsibilities of Management and Those Charged with Governance
for the Standalone Financial Statements**

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for

ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to

continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters.

Notes to Standalone Financial Statements for the year ended 31st March 2024

1 Significant: Material Accounting Policies Information.

1.1 Corporate Information

TVS Investments Private Limited [Formerly Geeyes Family Holdings Private Limited] ("TVSI" or "the Company") is incorporated in India and is a closely held company.

The main activities of the company are those relating to investment (including trading) and consultancy in the field of investment related activities.

1.2 Statement of Compliance

The Standalone financial statements of the Company have been prepared on mercantile basis as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under section 133 of the Companies Act, 2013, (the "Act") and other relevant provisions of the Act.

The Standalone financial statements for the year ended 31st March, 2024 (including comparatives), are approved for issue by the Board of Directors in the meeting held on 9th November, 2024.

1.3 Functional and Presentation currency

These Standalone financial statements are presented in functional currency, i.e., Indian Rupees (Rs.) and all values are rounded to the nearest lakh with two decimals except where otherwise indicated.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.4 Basis of preparation and presentation

These standalone financial statements have been prepared and presented under accrual basis of accounting and as a going concern on historical cost convention or fair values* as per the requirements of Ind AS prescribed under section 133 of the Act and relevant provisions thereon, except for certain class of financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Disclosures under Ind AS are made only in respect of material items and in respect of the items that will be useful to the users of financial statements in making economic decisions.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis except for leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

1.5 Current and Non-Current Classification

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle or 12 months or other criteria as set out in the Schedule III to the Companies Act, 2013. Based on the nature of its business, the company has ascertained its operating cycle to be 12 months for the purpose of current and non-current classification of assets and liabilities.

1.6 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable.

1.6.1 Rendering of services

Revenue derived from Management services are recognised on accrual basis (net of service tax or Goods and Service Tax) upon completion of services performed as per the terms of the respective Shared Services Agreement.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.6.2 Dividend and interest income

Dividend income from investments is recognised when the shareholder's right to receive payment is established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition. Interest income is recognised on time proportion basis.

1.6.3 Rental income

Rental income from operating leases (of company's investment properties) is recognised on straight-line basis over the term of the relevant lease, except where rentals are structured to increase in line with expected general inflation. Initial direct cost, if any, incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on straight-line basis over the lease term.

1.6.4 Gain on sale of Investments

The gain on sale of investments is recognized based on the difference between the cost and the Net Asset Value (NAV) /Market rate of the investments on the date of selling.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.6.5 Other Income

Other income is recognised on accrual basis provided that it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

1.7 Property, plant and equipment

1.7.1 Recognition and measurement

The cost of property, plant and equipment comprises its purchase price, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, including relevant borrowing costs for qualifying assets and any expected costs of decommissioning, net of any trade discounts and rebates.

1.7.2 Subsequent expenditure

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Property, plant and equipment are stated in the balance sheet at cost less accumulated depreciation / amortization and impairment, if any.

1.7.3 Disposal of property, plant and equipment

An item of property, plant and equipment is derecognized upon disposal or on retirement, when no future economic benefits are expected to arise from the continued use of the asset.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

Gains or losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the Statement of Profit and Loss within other gains / (losses).

1.7.4 Depreciation

Depreciation is recognised on a straight-line basis over the useful life as prescribed by the Companies Act, 2013 except in the following cases where the useful life of the assets has been assessed based on technical advice. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Depreciation is provided for on pro-rata basis on additions and deletions made during the year.

Estimated useful lives of the assets are as follows:

Assets	Useful Life in years
Office Equipment, Furnitures & Fixtures	5 years *
Computers	5 years #

*Useful life of Furniture & Fixture is 10 years as per Schedule II to Companies Act, 2013. Management has estimated the useful life to be 5 years.

Useful life of Computer is 3 years as per Schedule II to Companies Act, 2013. Management has estimated the useful life to be 5 years.

1.8 Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes, is classified as investment

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

property. Investment property is measured initially at its cost, including related transaction costs and where applicable, the borrowing costs.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of investment property is replaced, the carrying amount of the replaced part is derecognized.

Investment properties (except land) are depreciated using straight line method over their estimated useful lives. Investment properties generally have a useful life of 60 years. The useful life has been determined based on technical evaluation by Management.

1.9 Impairment of Property, Plant & Equipment

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets, if any to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the

impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the statement of profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the statement of profit or loss.

1.10 Leases

Ind AS 116 requires a lessee to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease. If the use of such option is reasonably certain, the company makes an assessment of the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the company's operations, taking to account the location of the underlying asset and the availability of suitable alternatives. The lease term for future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

The company does not have any non-cancellable lease and hence Ind AS 116 is not applicable to the company.

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.11 Inventories

The company does not hold any inventory. Hence, Ind AS 2 is not applicable.

1.12 Employee Benefits

1.12.1 Retirement benefit costs and termination benefits

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period.

Defined benefit costs are categorized as follows:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- Net interest expense or income; and
- Remeasurement

The company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'.

Past service cost is recognised in the statement of profit or loss in the period of a plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to the statement of profit or loss.

Curtailment gains and losses are accounted for as past service costs. The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this

calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Under GAAP, Long term compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised at the present value of the defined benefit obligation as at the balance sheet less the fair value of the plan assets out of which the obligations are expected to be settled.

1.12.2 Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

1.13 Income Taxes

Income tax expense represents the sum of the tax currently payable and deferred tax. Current and deferred tax are recognized in Statement of profit and loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

1.13.1 Current Tax

Current tax is determined on taxable profits for the year chargeable to tax in accordance with the applicable tax rates and the provisions of the Income Tax Act,

(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1961 including other applicable tax laws that have been enacted or substantively enacted.

1.13.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases

used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each annual reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

1.14 Foreign Currency Transactions

The functional currency of the Company is Indian Rupees which represents the currency of the primary economic environment in which it operates

In preparing the financial statements of the company, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the statement of profit or loss in the period in which they arise.

During the year, there is no foreign currency transaction.

1.15 Provisions, Contingent Liabilities and Contingent Assets.

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the receivable can be measured reliably.

There are no contingent liabilities and contingent assets as on the reporting date and hence disclosure is not required

1.16 Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss

attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

1.17 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred under finance costs. Borrowing

cost also includes exchange differences to the extent regarded as an adjustment to interest costs.

There are no borrowing costs incurred during the year ended 31st March 2024.

1.18 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual rights / obligation of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in Statement of profit and loss.

Financial assets (other than investments and derivative instruments) are subsequently measured at amortised cost using the effective interest method.

1.19 Financial asset

All financial assets are reviewed at the end of each reporting period to assess impairment.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.19.1 Impairment of financial assets

The Company applies expected credit loss model for recognising impairment loss on trade receivables, other contractual rights to receive cash or other financial assets. Expected credit losses are measured through a loss allowance at an amount equal to:

- a. the 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- b. full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring the lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

1.20 Financial liabilities and equity instruments

1.20.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognized at the proceeds received, net of direct issue costs.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

1.20.2 Financial liabilities

All financial liabilities are subsequently measured at amortized cost using the effective interest rate method or at Fair Value through Profit or Loss (FVTPL).

1.20.3 De-recognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid / payable is recognised in statement of profit and loss.

1.21 Statement of Cash flow

Cash and cash equivalents comprise cash on hand, balances with bank.

Cash flows are reported using the indirect method, whereby profit/ (loss) before exceptional items and tax is appropriately classified for the effects of transactions of non-cash nature and any deferrals or accruals of past or future receipts or payments. In cash flow statement, cash and cash equivalents include cash on hand, balances with banks in current accounts and other short-term highly liquid investments with original maturities of three months or less.

(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

1.22 Dividend on ordinary shares

The Company recognises a liability to make cash or non-cash distributions to equity holders of the company when the distribution is authorised and the distribution is no longer at the discretion of the Company. The amount so authorised is recognised directly in equity.

1.23 Indian Accounting Standards / amendments issued

The Ministry of Corporate Affairs ('MCA') notifies new standards or amendments to existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. As on the date of Standalone Financial Statements, MCA has not notified any new standards or amendments to the existing standards which are effective from April 01, 2024.

1.24 Critical accounting judgments and key sources of estimation uncertainty

The preparation of financial statements in conformity with Ind. AS requires the Company's Management to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities recognised in the financial statements that are not readily apparent from other sources. The judgements, estimates and associated assumptions are based on historical experience and other factors including estimation of effects of uncertain future events that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period, if the revision affects current and future period.

**TVS Investments Private Limited, Chennai
(Formerly Geeyes Family Holdings Private Limited)**

Notes to Standalone Financial Statements for the year ended 31st March 2024

The following are the critical judgements and estimations that have been made by the Management in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements and/or key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

1.24.1 Provisions and liabilities

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgement to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

1.24.2 Fair value measurements and valuation processes

Some of the Company's assets and liabilities are measured at fair value for financial reporting purposes. The Management determines the appropriate valuation techniques and inputs for the fair value measurements.

1.24.3 Property, Plant and Equipment

Some of the Company's fixed assets have been depreciated based on technical assessment as provided in Note No. 1.7.4

24 Income tax expense

Indian companies are subject to Indian income tax on a standalone basis. Each entity is assessed to tax on taxable profits determined for each fiscal year beginning on April 1 and ending on March 31.

Incomes are assessed based on book profits prepared under generally accepted accounting principles in India adjusted in accordance with the provisions of the Income tax Act, 1961. Such adjustments generally relate to depreciation of fixed assets, disallowances of certain provisions and accruals, the set-off of tax losses and depreciation carried forward and retirement benefit costs.

29. Financial instruments**a) Capital management**

The Company's capital management is intended to maximise the return to shareholders for meeting the long-term and short-term goals of the Company through the optimization of the debt and equity balance.

The Company determines the amount of capital required on the basis of annual and long-term operating plans and strategic investment plans. The funding requirements are met through equity and long-term/short-term borrowings. The Company monitors the capital structure on the basis of Net debt to equity ratio and maturity profile of the overall debt portfolio of the Company

For the purpose of capital management, capital includes issued equity capital and all other reserves attributable to the equity shareholders of the Company. Net debt includes all long and short-term borrowings as reduced by cash and cash equivalents.

The following table summarises the capital of the Company:

c) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its treasury activities, including deposits with banks and financial institutions, and other financial instruments. The carrying amounts represent the maximum exposure of the company to the credit risk on such instruments.

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to the customer credit risk management. The Company uses financial information and past experience to evaluate credit quality of majority of its customers and individual credit limits are defined in accordance with this assessment. Outstanding receivables and the credit worthiness of its counterparties are periodically monitored and taken up on case to case basis. The Company evaluates the concentration of risk with respect to trade receivables as low.

The credit risk on cash and bank balances is limited because the counterparties are banks with high credit ratings assigned by international credit rating agencies.

The table below provides details of carrying amount of financial assets as at :

Risk exposure

Defined benefit plan

(i) Gratuity

The Company has funded the gratuity liability ascertained on actuarial basis, wherein every employee who has completed five years or more of service is entitled to gratuity on retirement or resignation or death calculated at 15 days salary for each completed year of service, subject to a maximum of Rs. 20 lacs per employee. The vesting period for Gratuity as payable under The Payment of Gratuity Act, 1972 is 5 years.

The plans in India typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.
Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to government bond yields; if the return on plan asset is below this rate, it will create a plan deficit.

Interest risk: A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

24 Income tax expense

Indian companies are subject to Indian income tax on a standalone basis. Each entity is assessed to tax on taxable profits determined for each fiscal year beginning on April 1 and ending on March 31.

Incomes are assessed based on book profits prepared under generally accepted accounting principles in India adjusted in accordance with the provisions of the Income tax Act, 1961. Such adjustments generally relate to depreciation of fixed assets, disallowances of certain provisions and accruals, the set-off of tax losses and depreciation carried forward and retirement benefit costs.

The Company monitors the capital structure on the basis of Net debt to equity ratio and maturity profile of the overall debt portfolio of the Company

For the purpose of capital management, capital includes issued equity capital and all other reserves attributable to the equity shareholders of the Company. Net debt includes all long and short-term borrowings as reduced by cash and cash equivalents.

c) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its treasury activities, including deposits with banks and financial institutions, and other financial instruments. The carrying amounts represent the maximum exposure of the company to the credit risk on such instruments.

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to the customer credit risk management. The Company uses financial information and past experience to evaluate credit quality of majority of its customers and individual credit limits are defined in accordance with this assessment. Outstanding receivables and the credit worthiness of its counterparties are periodically monitored and taken up on case to case basis. The Company evaluates the concentration of risk with respect to trade receivables as low.

The credit risk on cash and bank balances is limited because the counterparties are banks with high credit ratings assigned by international credit rating agencies.

The table below provides details of carrying amount of financial assets as at :

Fair Value**30. Fair value measurement hierarchy**

This note explains the judgements and estimates made in determining the fair values of the financial instruments that are:

- (a) recognised and measured at fair value and
(b) measured at amortised cost and for which fair values are disclosed in the financial statements.

To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the Indian Accounting Standards. An explanation of each level follows underneath the table.

Fair Value

The company for the purpose of determining and disclosing fair value of financial instruments, classifies the financial instruments in three levels of hierarchy depending on the inputs employed in determining its fair value.

Level 1: This hierarchy includes financial instruments measured using quoted (unadjusted) prices in active markets for identical assets or liabilities. This includes listed equity instruments, whose fair value is valued using closing price at the reporting period.

Level 2: The fair value of financial instruments that are not traded in active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all the significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

There are no transfers between Level 1 and Level 2 during the year

Valuation technique used to determine fair value:

Specific valuation techniques used to value financial instruments include Net Asset Value as disclosed by fund house.

Valuation processes:

The finance department of the Company performs the valuation of financial assets and liabilities required for financial reporting purposes.

Fair value of financial assets and liabilities measured at amortised cost:

The carrying amounts of trade receivables, trade payables, deposit received, cash and cash equivalents and other current financial liabilities are considered to be the same as their fair values, due to their short-term nature and insignificant change in interest rate.

Loans to employees included in other financial assets, not being material, have not been fair valued.

Fair valuation of Indemnity Deposits

The agreements for the indemnity deposits received for the use of the trade name do not specify the tenure. Due to this impracticability, the deposits have not been fair valued.

Defined benefit plan

(i) Gratuity

The Company has funded the gratuity liability ascertained on actuarial basis, wherein every employee who has completed five years or more of service is entitled to gratuity on retirement or resignation or death calculated at 15 days salary for each completed year of service, subject to a maximum of Rs. 20 lacs per employee. The vesting period for Gratuity as payable under The Payment of Gratuity Act, 1972 is 5 years.

The plans in India typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to government bond yields; if the return on plan asset is below this rate, it will create a plan deficit.

Interest risk: A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk: The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

8	Kindly provide the working for how the consideration of 1,11,60,093 shares shall be distributed between the shareholders of TVSIPL?	The shareholders of TVSIPL shall receive 1,11,60,093 shares of TVSEL in the proportion of their holding in TVSIPL post effectiveness of the Concurrent Scheme. Accordingly, the working for the distribution of the shares has been attached herewith as Annexure '3' .
9	How the scheme will be beneficial for the shareholders of TVSEL as the Net worth remains unchanged as Rs. 101.05 Crores pre and post the scheme of amalgamation?	The proposed merger would result in promoter directly holding the shares in TVSEL, leading to simplification of the shareholding structure and demonstrate the promoter's direct commitment to and engagement with TVSEL. By delaying the shareholding tiers, the proposed merger gives greater flexibility to TVSEL to expand its activities either by acquisitions or investment directly in subsidiaries, as permissible under the Companies Act, notwithstanding the net worth remaining the same.
10	Brief details of the transferee/resulting and transferor/demerged companies as per format enclosed at Annexure VIII.- Net worth details of TVSEL are incorrect.	The net-worth of TVSEL has been computed based on the definition of 'net-worth' as per Section 2(57) of the Companies Act, 2013. Accordingly, the net-worth certificate of TVSEL reflects a net worth of INR 101.05 Crores, and the brief details of the Transferor Company and Transferee Company reflects as INR 101.06. The difference in the net-worth in the above two documents is due to rounding-off.
11	Confirmation by the Managing Director / Company Secretary as per format enclosed as Annexure XI.: a) kindly remove the wordings 'If applicable' from point b) iii) and resubmit. b) kindly submit a snapshot of the scheme related documents submitted on the website of the Company. c) please confirm point g applicable or not.	Based on your suggestion, the revised confirmation by the managing director / company secretary is attached herewith as Annexure '4A' . 13	Brief details of the Board of Directors and Promoters of transferee / resulting and transferor / demerged companies as per format enclosed at Annexure IX- why Harita Properties LLP is not considered in the promoter group of TVSEL?	We have excluded the promoter group namely Harita Properties LLP since the format as per Annexure IX specifies only promoters. We resubmit Annexure IX now including the details of the Promoter Group of TVSEL as Annexure '6' .

3. SOURCES OF INFORMATION

- 3.1. For the purpose of the recommendation of the Share Exchange Ratio / Share Entitlement Ratio, I have relied upon the following sources of information provided by the management of the Companies:
- (a) Audited Financial Statements of TVSWPL, TVSCFPL, TVSIPL and SIPL for the year ended 31st March 2022;
 - (b) Financial Statements of TVSIPL, GCFPL TCFPL, TVSWPL and SIPL for the year ended 31st March, 2023;
 - (c) Unaudited Provisional Financial Statements of TVSIPL as on 30th April 2023;
 - (d) Shareholding pattern of the Companies as on the date of this report;
 - (e) Draft Scheme;
 - (f) Memorandum and Articles of Association of the Companies;
 - (g) Other relevant details of the Companies such as its history, past and present activities, future plans and prospects, and other relevant information; and
 - (h) Such other information and explanations as required and which have been provided by the management of the Companies.

Besides the above information and documents, there may be other information provided by the Companies which may not have been perused by me in any detail, if not considered relevant for the defined scope. The Companies have been provided with the opportunity to review the draft report as part of the standard practice to make sure that factual inaccuracy & omissions are avoided in the final report.

4. BASIS OF RECOMMENDATION .

- 4.1. For the purpose of my opinion, I have relied upon the current beneficial shareholding of the Companies, the draft Scheme and other information as provided by the management of the Companies and their respective advisors and authorized representatives.
- 4.2. Based on the review of the information made available and my discussions with the management of the Companies, authorized representatives and advisors of the Companies, some of the important factors considered for recommendation of the Share Exchange Ratio / Share Entitlement Ratio are as under:
- (a) TVSWPL, TVSCFPL, TVSIPL, GCFPL and SIPL are unlisted private limited companies, which as on date are economically and beneficially held by the same group of shareholders;

- (b) As per the proposed draft Scheme, as a result of the amalgamation of TVSWPL and TVSCFPL into TVSIPL, and subsequent demerger and vesting of respective Business Undertakings of TVSIPL into GCFPL and SIPL, the demerged business of TVSIPL will continue to be held by the same group of shareholders and therefore, the interest of the shareholders as a group will not be prejudicially affected as the same group of shareholders will continue to beneficially hold the business through GCFPL and SIPL;
 - (c) Consequently, pre and post Scheme, the economic and beneficial control in the transferred business of TVSWPL, TVSCFPL and TVSIPL will continue to remain with the same group of shareholders and the proposed Scheme will be value-neutral to the current group of shareholders, hence fair valuation of the entities / demerged undertaking will have no relevance for the present exercise for the proposed Composite Scheme of Arrangement. In light of this, it is not necessary to conduct a fair valuation exercise of the entities / demerged undertaking forming part of the Scheme;
 - (d) The Scheme does not envisage dilution of the holding of the current group of shareholders of the Companies as a result of operation of the Scheme;
 - (e) The Share Exchange Ratio / Share Entitlement Ratio as may be decided as thought appropriate by the existing Board of Directors and Shareholders of the Companies and mutually agreed between the Parties may be considered fair and reasonable with respect to this Scheme; and
 - (f) As represented by the management of the Companies, terms of the draft Scheme are part of commercial and business arrangement.
- 4.3. It is universally recognized that the basis of recommendation is not an exact science and that recommendation of the Share Exchange Ratio and Share Entitlement Ratio necessarily involves selecting an approach that is suitable for the purpose. The application of any particular approach depends upon various factors including nature of its business, overall objective of the Scheme and the purpose of recommendation.

5. SHARE EXCHANGE RATIO / SHARE ENTITLEMENT RATIO

- 5.1 In the ultimate analysis, recommendation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g., present and prospective competition,

yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

'If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible.'

- 5.2 The basis of Share Exchange Ratio / Share Entitlement Ratio under the Scheme would have to be determined after taking into consideration all the factors and approach mentioned hereinabove and considering participant specific view taking into account the nature of the Scheme and beneficial shareholding of the Companies. It is however important to note that in doing so, I am not attempting to arrive at the absolute value per share of the Company(ies) as the Companies would beneficially be held and controlled by the same group of shareholders, thereby the interest of the shareholders as a group will effectively remain unchanged and shareholders interest as a group would not be prejudicially affected. Hence, no relative valuation of the Companies is required to be undertaken to facilitate the determination of the Share Exchange Ratio / Share Entitlement Ratio.
- 5.3 In the light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove earlier in this report (including disclaimer and exclusions given below), in my opinion and after giving due consideration to the management representations, the following Share Exchange Ratio / Share Entitlement Ratio as suggested by the management of the Companies, would be fair and reasonable –

Particulars	Share Exchange Ratio / Share Entitlement Ratio (rounded off)
For equity shareholders of TVSWPL	The entire paid up equity share capital of TVSWPL is held by TVSCFPL. Since

	<i>TVSCFPL is being amalgamated with TVSIPL, no shares are being issued to the shareholders of TVSWPL, being TVSCFPL itself</i>

b)	Whether the transaction would fall under Related Party Transaction? If yes, whether the same is done at arms' length?	In terms of General Circular No. 30/2014 dated 17 th July 2014 issued by Ministry of Corporate Affairs (the "MCA Circular"), the transactions arising out of compromises, arrangements and amalgamations under the Companies Act, 2013 (the "Act"), will not attract the requirements of Section 188 of the Act.

d)	Rationale for the Scheme	<p>Rationale for the Scheme which deals with the amalgamation of the Transferor Company with and into the Transferee Company as a result of which the shareholders of the Transferor Company (including the promoter / promoter group) would directly hold shares in the Transferee Company, since it is envisaged that the following benefits would, <i>inter alia</i>, accrue from the Amalgamation:</p> <ol style="list-style-type: none"> a. The Amalgamation would result in the promoters of the Transferor Company directly holding shares in the Transferee Company, which will not only lead to simplification of the shareholding structure and reduction of shareholding tiers but also demonstrate the promoter group's direct commitment to and engagement with the Transferee Company; b. The promoter / promoter group of the Transferee Company is desirous of streamlining its holding in the Transferee Company. As a step towards such rationalization, it is proposed to merge the Transferor Company into the Transferee Company; c. The Amalgamation will enable greater focus of the

Consolidation and simplification of the group structure and reduction of administrative costs and legal and regulatory compliances at the group level; and</p> <p>e. By removing Transferor Company as a holding Company of TVS-E thereby giving greater flexibility to the Company to make down-stream investment since the same will remove the restriction on number of layers applicable under the Companies Act 2013 from time to time.</p> <p>Accordingly, the Board of Directors of the Transferor Company and the Transferee Company have formulated this Scheme to undertake various steps as envisaged in this Scheme pursuant to the provisions of Sections 230-232 of the Companies Act, 2013 (including any statutory modification or re-enactment or amendment thereof).</p> <p>There is no likelihood that the interests of any shareholder or creditors of the Transferor Company or the Transferee Company would be prejudiced as a result of the Scheme. The Scheme does not affect the rights of the creditors of the Transferor Company or the Transferee Company.
